I OPPOSE THE DRAFT M.O.U. being proposed by the FDA. In particular, I OBJECT to the definition of "inordinate amount" which restricts the availability and the right to obtain medically necessary compounded medications by limiting the number of prescriptions that can be shipped across state lines from specialized compounding pharmacies.

COMMENTS: I lived every pharmacy in the Philadelphia area to get the natural estrogen capsules I needed — they don't give me the unpleasant side effects of Premarin. None had them because "they cost too much to make since they had to be hand compounded." Women's Health of America is a reputable, professional pharmacy. Please don't let the moneyed lobbyists restrict the availability of compounded medications. I do not want the government deciding what's best for me — that's between my physician, me and a pharmacist that specializes in women's problems for more than 20 years. Thank you!
